Group Art Unit: 3402

Filed: June 7, 1995

Examiner: N. Kamen

For: AN IMPROVED MEANS FOR TREATMENT OF THE GASES
OF COMBUSTION ENGINES AND THE TRANSMISSION OF
THEIR POWER

SUPPLEMENTAL AMENDMENT

Honorable Commissioner of
Patents and Trademarks
Washington, D.C. 20231

Sir:

In supplement to the Amendment filed April 30, 1997,
please add the following claim.

IN THE CLAIMS:

-- 77. A device for the working of fluids having a
cylinder assembly, at least one component mounted to reciprocate
within said cylinder assembly and a housing, said cylinder
assembly consisting of at least one pair of cylinder portions
each having an end, said component having working surfaces that
in operation with said cylinder assembly define at least one
fluid working chamber of cyclically variable capacity, said
housing being mounted externally of said cylinder assembly and
disposed so that said cylinder assembly rotates in said housing
while said component reciprocates within said assembly. --

Please amend claim 75 as follows:

Claim 75, line 1, change "72" to --74--.
